**CWNP® at Aruba Atmosphere 2016 in Las Vegas from March 6-11**

*The Largest Mobility Conference - Go Mobile and Go Cloud!*

LAS VEGAS, NEVEDA – February 26, 2016 – Organized by Aruba Networks, Aruba Atmosphere 2016 is one of the premier technical conferences and dubbed “*The Largest Mobility Conference on Earth*”. It’s where mobility experts, architects, engineers, salespeople and C-level executives come together to share ideas, network, learn about emerging technologies and improve their skillsets.

One of the central themes of this year’s conference is on the value of continued education — on giving people access to certification training that will advance their knowledge and allow them to learn new ways to deploy and troubleshoot applications.

As a preferred Aruba Networks partner, providing training to their employees and reseller community, CWNP is honored to attend Atmosphere 2016.

This premier event will be held at the Cosmopolitan Hotel in Las Vegas, NV, from March 6-11, 2016, and Heather Hobbs, Marketing Director, and Renzo Conserva, Americas Training Manager of CWNP, will be in on hand, representing CWNP. “The Aruba Atmosphere 2016 conference offers an exciting lineup of sessions across several categories that directly relate to our certifications and curriculum,” says Hobbs. “By learning about the latest trends and issues in the field and how people are solving them in new ways, we can further strengthen our wireless certification programs and ensure that they are the most rigorous and respected in the industry,” adds Hobbs.

Beyond the numerous networking prospects this conference provides, Renzo Conserva says he is looking forward to attending sessions such as: *The 802.11ac Technology Deep Dive*, *Building a Trust-Based Internet of Things for Business Critical Apps*, and *The TEN Talks at Airheads: Adaptive Trust Defense*, among others.

“From product demos to mobile engagement to seeing how the latest wired and wireless products and technologies shaping our digital workplace, Atmosphere 2016 will enable us to bring back new learning and ideas that will advance CWNP and make us more relevant than ever,” says Conserva.
